

Jens Willads Ullerup

Motion Graphic Magician

CV

My mission is to craft unforgettable motion graphics and animation videos that cater to your unique vision. With a touch of magic, I weave together programs like After Effects, Moho, Blender, Audition, Photoshop, and Illustrator to create something truly special. When I'm not working in my digital studio, I find inspiration in nature's sounds and the beauty of the great outdoors. Drawing, photography, and music are other skills I possess that complement my work in animation videos to create unforgettable visual experiences. My curiosity knows no bounds, and I love discussing the latest technological advancements.
